RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 84 pages. Original publisher: Portland, Or. : Independent Scientific Advisory Board, 2007 OCLC Number: (OCOlc)229160742 Subject: Nature -- Effect of human beings on -- Columbia River Watershed. Excerpt: . . . ISAB 2007-3 H P R UMAN OPULATION EPORT Immigration numbers are highly variable over time. The annual number of legal and illegal migrants to the United States grew rapidly in the mid-1990s, peaked by the late 1990s, then declined substantially after 2001. By 2004, the annual inflow of foreign-born persons had declined 24 from its all-time high in 2000. Immigration levels in 2004 are comparable with those of the mid-1990s and still significantly below the peak levels of 1999 - 2000 (Passal and Suro 2004; U. S. Citizenship and Immigration Services n. d.). Key United States population trends over the past century are identified in Markham and Steinzor (2006): Population growth: U. S. growth is higher than other industrialized nations at a current annual rate of slightly less than 1 (Population Reference Bureau 2005). Population density: U. S. population density doubled to 80 people per mi. , although it remained low relative to the world average of 120 per mi. (Hobbs and Stoops 2002). Population distribution: The United States changed from being primarily rural to urban and suburban. By 2000, half of all Americans lived in suburban areas (Hobbs and Stoops 2002; US Census Bureau 2001). Regional distribution: The U. S. population shifted South and West, and those regions dominated the century's growth (Hobbs and Stoops 2002). The West: Population grew faster in the West than in any other U. S. region (Hobbs and Stoops 2002). The Census Bureau updates population figures from...
