Kurzer Inbegriff Der Christlichen Lehre, Oder Katechismus

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 24 pages. Original publisher: Gaithersburg, Md. : U. S. Dept. of Energy, Office of Science, 2007 OCLC Number: (OCOLOC)721322670 Subject: Stellarators -- Research. Excerpt: . . . To explore the potential advantages of disruption avoidance and steady state operation in a more compact (low aspect ratio) advanced stellarator employing the quasi-axisymmetric magnetic configuration, the NCSX experiment was approved by FESAC in 2001 as a PoP class device in the US fusion energy science program. This places it between smaller Concept Exploration experiments, such as HSX at the University of Wisconsin-Madison, and larger Performance Extension class experiments, such as the DIII-D National Tokamak Facility in the US, the LHD stellarator in Japan, the W7-X stellarator under construction in Europe and the even larger burning-plasma class experiment, ITER. There are two other PoP class experiments in the US fusion program: the NSTX experiment at PPPL, exploring the compact torus magnetic configuration, and the MST experiment at the University of Wisconsin-Madison, exploring the reversed field pinch magnetic configuration. The characteristic of a PoP class experiment is that it has the size, magnetic field, and plasma heating systems to allow...
